

## Do your employees know how to drive defensively?

According to the National Safety Council (NSC), vehicle collisions are the leading cause of death and injury in the workplace.

What can you as a company owner do to help both your employees and your bottom line? Take advantage of United Fire Group's (UFG) complimentary Defensive Driving Training course developed by the NSC.

As certified instructors for the NSC, our risk control experts will teach your employees skills and techniques to avoid collisions, reduce traffic violations and change driver behaviors and attitudes. And you'll reap the benefits of having more responsible drivers who apply best practices while driving your company vehicles.

### THE 4-HOUR CLASSROOM COURSE FEATURES:

- A blend of learning methods to encourage participation and improved retention.
- Hazardous condition re-enactments and driving scenarios to reflect real-life situations.
- Multiple testing strategies, knowledge checks and final exam to ensure comprehension.
- Six 10-minute supplemental modules based on specific safety issues or incident trends.
- Preferred class sizes of 10-25 students.

**To learn more or to schedule a course for your employees, contact your UFG risk control consultant or Ward Johnson at [wjohnson@unitedfiregroup.com](mailto:wjohnson@unitedfiregroup.com).**

Currently available in the following states only: Alabama, Florida, Illinois, Indiana, Kansas, Kentucky, Minnesota, Nebraska, Tennessee and Wisconsin.
